

What is i3 recruit?

i3 is a full Organisational Development tool that will support you with the whole talent management, succession planning and employee development life-cycle.

Use the i3 recruit platform to add a new dimension to enhance a more traditional recruitment process. This assessment tool will help to **identify** natural ability and the right talent, gaining an objective, in-depth insight on potential candidates, both internal and external, applying for a role.

The i3 recruit report is an easy to understand one-page report designed specifically for the recruitment process. As well as the candidate report you can create a role assessment, that produces a role profile which is used as a guide to measure candidates against your specific needs. Assessments are created in real time at either Management or General level.

As a truly cradle to grave assessment tool, the output of this report will continue to add value, personalising the onboarding, integration and development of your employees. Widely used by Recruitment Businesses and Independent Recruiters revolutionising the approach and service offered to their clients.

What is different about i3?

There are 4 clear differences that stands i3 apart from many other assessment tools:

- i3 profiles are unique – no two results generated from the assessment are the same. We believe in identifying what makes a person unique, building their self-awareness, belief and direction. Visual, transparent and engaging focussing on the individual; there is no pigeon holing with i3.
- One assessment, multiple outputs! Rather than have to get people to do different assessments relative to different needs, with an i3 assessment their reports can effectively be embedded throughout any aspect of a talent management strategy.
- Cost effective and flexible purchasing options with no license fee, no re accreditation cost and no shelf life.
- Direct management and access facilitating your own online account, operating as an in-house system with personal account management reactional to your specific needs.
